Full Stack Developer | React.js · Next.js · Node.js

Professional Summary

Full Stack Developer with hands-on experience shipping scalable, high-performance web applications using React.js, Next.js, Node.js, Express.js, TypeScript, and MongoDB. Independently designed, built, and launched LeadCraft – a live B2B lead generation platform with NextAuth/OAuth 2.0 authentication and Stripe billing – owning the full product lifecycle from architecture to production deployment. Strong in RESTful API integration, SSR/SSG performance optimization, Dockerized deployments, and state management with Redux Toolkit and Context API.

Technical Skills

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, GSAP, Framer Motion, Responsive Web Design

State Management: Redux Toolkit, Context API

Backend: Node.js, Express.js, Django, RESTful APIs

Authentication: JWT, OAuth 2.0, NextAuth

Database: MongoDB, Supabase, PostgreSQL

Tools & Cloud: Git, GitHub, Docker, AWS (S3, EC2), Vercel, Render, Postman, Stripe, Technical SEO, Core Web Vitals

AI & Integrations: Gemini AI API, Claude API

Experience

SynkrAI

Ahmedabad, Gujarat, India

Full Stack Developer

Apr 2026 – Present

- Lead implementation of new product features across frontend and backend using React.js, Next.js, Node.js, and Express.js, from technical planning through deployment.
- Participate in client meetings to clarify feature requirements and translate business needs into technical implementation plans.
- Review pull requests and collaborate with cross-functional teams to maintain code quality and reusable component architecture.
- Support production deployments and resolve post-release issues to ensure reliable application performance.

Full Stack Developer Intern

Sep 2025 – Mar 2026

- Developed and optimized 3 customer-facing dashboards in React.js and Next.js, leveraging SSR/SSG to reduce average page load time by 40% and improve Core Web Vitals scores.
- Designed and maintained RESTful Node.js/Express APIs with JWT-based authentication, handling high-volume daily traffic for an AI-powered platform with a focus on reliability and uptime.
- Translated Figma designs into pixel-perfect, fully responsive UIs across 2 company websites, shipping 15+ production features using reusable component architecture and Tailwind CSS.
- Introduced structured code review practices and a pre-release QA checklist, reducing post-release defects by an estimated 60%.

Projects

LeadCraft – B2B Lead Generation Platform (Live: leadcraft.indevs.in) | Next.js 14, NextAuth, Supabase, Stripe, Docker, Vercel

- Independently architected, built, and launched a live B2B SaaS platform featuring contact scraping, AI-based lead scoring, CSV export, and Stripe-powered subscription billing.
- Implemented NextAuth-based OAuth 2.0 authentication with role-based access control (RBAC), subscription management, and Technical SEO optimization for improved organic discoverability.
- Containerized the application using Docker and managed deployment pipeline on Vercel with Google Search Console setup and OAuth consent screen verification.

SkillsSync – AI-Powered Career Platform (Live: skillsyncresume.vercel.app) | React.js, Django, MongoDB, AWS S3, Gemini AI, Tailwind

- Engineered a full-stack AI career platform delivering ATS resume scoring, job-match analysis, keyword gap detection, and interview prep recommendations using the Gemini AI API.
- Built a secure PDF export microservice with authenticated API routes and integrated AWS S3 for file storage, deployed on Vercel/Render with SSR and accessibility best practices.

Freelance Client Work – Vigorous LLC & Nidtrix Technologies (nidtrix.com) | Next.js, GSAP, Tailwind CSS, SSR/SSG, Vercel

- Delivered pixel-perfect, fully responsive websites for 2 live clients from Figma designs, using Next.js SSR/SSG for improved SEO ranking and Core Web Vitals performance.
- Integrated GSAP-powered scroll animations and micro-interactions, and architected reusable component systems to reduce future development and revision time.

Plano – Subscription Management Platform (Hackathon, Odo) | github.com/utsav-mistry/plano | Next.js, Node.js/Express, MongoDB, I

- Built core frontend flows in Next.js (App Router) for a production-style subscription management platform, covering subscription lifecycle, invoicing, and reporting views.
- Contributed to backend API routes and minor production/deployment tasks alongside a team implementing a full-stack architecture with Redis-backed caching/rate-limiting, BullMQ job queues, and Nginx reverse-proxy routing.
- Collaborated in a team setting to ship a working, deployable product within hackathon time constraints (Apr 2026).

Education

Lok Jagruti University

Ahmedabad, Gujarat, India

Bachelor of Technology – Computer Science & Engineering

2023 – 2027
